Profile

Artificial Intelligence undergraduate at the Faculty of Artificial Intelligence, Menoufia University, specializing in Intelligent Systems. Strong academic foundation in Machine Learning, Deep Learning, Embedded Systems, and Internet of Things (IoT). Seeking an opportunity to apply technical knowledge in a professional AI/ML environment.

Education

Faculty of Artificial intelligence - Menoufia University 09/2023 – Present

- Department: Intelligent Systems
- Expected Graduation: [2027]

Languages

• Arabic • English • Deutsch

Skills

Programming

Python
C++/ C

Embedded Systems & IoT

Arduino
Microcontrollers
TinyML

Artificial Intelligence

Machine Learning
Deep Learning
Computer Vision
LLMs
Model Evaluation & Optimization

Frameworks

Tensorflow
Pytorch
numpy
pandas
OpenCV
Yolo

Courses

Generative AI Engineering with LLMs 📄, IBM - Coursera 03/2026

Preparing for Google Cloud Certification: Machine Learning Engineer 📄, Google Coursera 09/2025

Deep Learning with Pytorch 📄, IBM, Coursera

Fundamentals of TinyML 📄, Harvard, EDX

TinyML2: Applications of TinyML 📄, Harvard, EDX

Projects

Sign Language Hand recognition

01/2026

This project is a Real-Time ASL Alphabet Recognition System that uses computer vision and deep learning to translate hand signs into text . It leverages MediaPipe for robust hand tracking and a custom-trained TensorFlow/Keras model for classification.

celebrities Face Classification

01/2026

A powerful full-stack application that detects and recognizes celebrity faces using deep learning. This project combines **FastAPI** for the backend with a **FaceNet + ArcFace** model for high-accuracy face recognition, and a modern **HTML/JS** frontend for user interaction
